

THE INTERNATIONAL COMMUNION OF CHARISMATIC CHURCHES

A HYBRID IN PERSON/VIRTUAL CONVENING

# NEW ERA MINISTRY

TRANSITIONAL STRATEGIES FOR THE FUTURE CHURCH

ATLANTA, GEORGIA USA

CONFERENCE WRAP-UP

## Archbishop Kirby Clements

The Community of The Holy Spirit  
[communityoftheholyspirit.org/](http://communityoftheholyspirit.org/)

***The Holy Spirit still gives creative and innovative ideas and strategies while reminding us of foundations.***

Sound doctrine, priesthood of the believers and the Holy Spirit is helping the redeemed community navigate into the future with confidence. This ICCC gathering was an impartation for there was a commission and even a re-commission. While the landscape of our world is changing, there are challenges and opportunities before us. As leaders we should empower people for the work of ministry. Integrity is staying true to Divine purposes, priorities and perspectives. We give thanks to the Lord and all who made this gathering happen. This is the ICCC!

**To know  
times, seasons  
and proper  
response is  
critical.**

# The Biblical Value of Unity

The International Communion of Charismatic Churches (ICCC) is open to all Christian church leaders who prioritize the biblical value of unity. The task of global evangelism is the assignment that Christ gave to each of His followers. We can do more together than alone.

Established in the 1970s, the ICCC transcends time and culture to provide needed wisdom, spiritual inspiration, and practical resources, to meet the needs of our world in this challenging season. The New Era Ministry conference spoke to this priority and served the body of Christ, offering information and insights to aid in navigating ministry in these times of progressive change.

# Convergence of the Digital and Physical realms

As the Church ventures into the convergence of the digital and physical realms, this conference proved to be an exciting catalyst for discussions among the members of the ICCC. The core mission of the church, which involves evangelism and spreading the teachings of the gospel, remained paramount. However, the event also delved into exploring innovative approaches and strategies in this new age of ministry. The general consensus reached was that we must strive for relevance, tap into our creativity, and discern where the Holy Spirit is guiding us in each season.

It was emphasized that technology is not our adversary; in fact, it is a powerful tool that can be harnessed to fulfill our mandate of sharing the gospel of the kingdom.

The conversation continues...

# Embracing Generational Unity

The emergence and growth of a trans-generational coalition within the International Communion of Charismatic Churches (ICCC) represents a significant turning point for its future. This coalition, comprised of individuals from diverse age groups, brings together a wealth of experience, wisdom, and fresh perspectives. By working together, this coalition is poised to catalyze transformative change, fostering a renewed sense of unity, relevance, and purpose within the ICCC. The combination of the seasoned leaders' deep-rooted knowledge and the youthful energy and innovative ideas of the younger generation will enable the ICCC to adapt to the evolving needs of its members and the wider world. It will enhance its engagement with contemporary issues, and cultivate an atmosphere of inclusivity and empowerment. Ultimately, this trans-generational coalition holds immense promise for the future of the ICCC, as it paves the way for a vibrant and dynamic Communion that remains at the forefront of the Charismatic movement globally.
